SAFETY

Throughout this publication, “Warnings” and “Cautions” (accompanied by one of the International HAZARD Symbols) are used to alert the mechanic to special instructions concerning a particular service or operation that may be hazardous if performed incorrectly or carelessly. They are defined below. **OBSERVE AND READ THEM CAREFULLY!**

These “Safety Alerts” alone cannot eliminate the hazards that they signal. Strict compliance to these special instructions when performing the service, plus training and “Common Sense” operation are major accident prevention measures.

***NOTE or IMPORTANT!:** Will designate significant informational notes.*

***WARNING!** Will designate a mechanical or nonelectrical alert which could potentially cause personal injury or death.*

***WARNING!** Will designate electrical alerts which could potentially cause personal injury or death.*

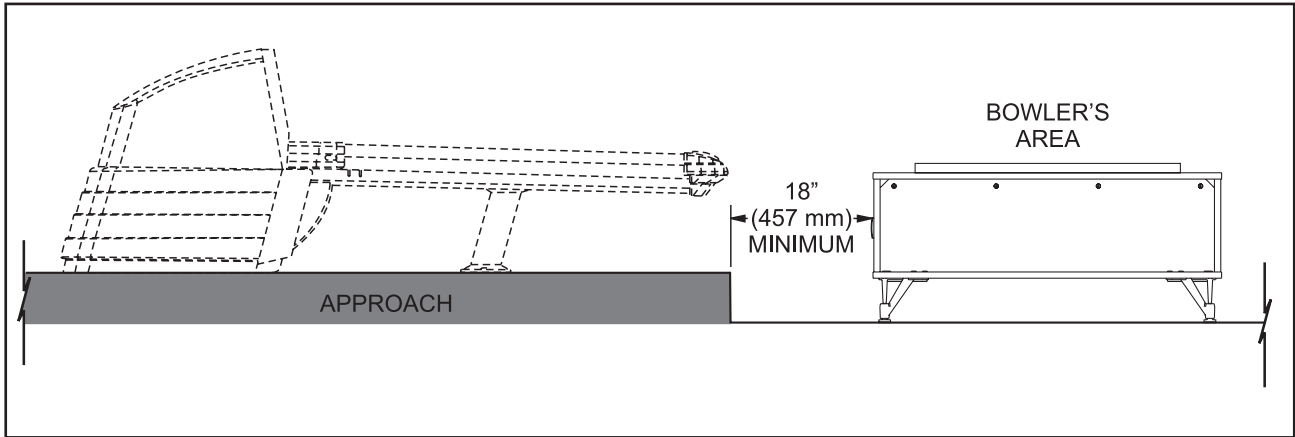

***CAUTION!** Will designate a mechanical or nonelectrical alert which could potentially cause product damage.*

Will designate grounding alerts.

IMPORTANT!: The distance between the furniture and the approach step up must be a minimum of 18" (457 mm). This distance is also required for any other objects or obstacles near the furniture.

Brunswick equipment is designed to deliver years of safe and reliable service when properly installed and used as intended. The safety and performance of your equipment, however, is dependant upon proper installation, maintenance, and use. Brunswick certified installers are required to follow the proper installation procedures found in the Brunswick Installation and Service Manuals. It is very important that all operators understand Brunswick guidelines for installation, maintenance, and product use. These guidelines can be found in the Service and Installation manuals specific to each installed product.

Failure to comply with these guidelines can reduce the useful life of your equipment; void your warranty, or cause injury or death to your employees or customers. Brunswick places great importance on safety. We therefore request that you acknowledge that you have reviewed the Service or Installation manuals for proper installation, maintenance, and use of your equipment.

- I have reviewed and acknowledge all guidelines in the Brunswick Installation or Service manuals, and I agree to maintain and service these products in accordance with these manuals.

- I have reviewed the guidelines and have voluntarily chosen to deviate from them in one or more of the following ways:
 - The equipment has been modified.
 - Product has not been installed by a Brunswick authorized installer.
 - Electrical specifications were not followed. (as described in pre-installation manual)
 - Pinsetter guards have been removed.
 - Furniture has not been attached to the floor. (as described in Installation and Service manuals)
 - Other

I agree to assume the risk of any product damage and injury or harm to any person arising out of my decision to deviate from Brunswick's recommended installation and maintenance procedures.

Section 2: Framework Furniture Specifications

FRAMEWORX® FURNITURE

The Framework Line by Brunswick has revolutionized the way centers function today. Customer-friendly seating and configuration flexibility have removed old barriers and allowed centers to improve traffic flow and free up valuable concourse space for additional revenue generators, such as amusements, restaurants, and snack bars.

The ergonomically designed furniture allows for a comfortable, neat looking center and eliminates the need for personnel to straighten chairs. Multiple furniture options offer configuration flexibility allowing bowlers to see the action from every seat.

The fixed seating option is a booth type setting. Swivel seats include a memory swivel with a 90 degree turning span. The chair rotates from right to left, moves out away from the table, and automatically returns to its original position behind the table. House ball racks create storage near the lanes or create additional food and beverage surfaces.

Framework furniture frames are constructed of tubular steel and coated with abrasion resistant paint. Frames have out riggers that are leveled and feature a locking mechanism that employs Hilti™ anchors to permanently secure to the floor.

The table tops are constructed of engineered wood composite and covered with durable laminates. Table tops are available with glow-in-the-dark or premium non-glow laminates.

Visible under black light, Cosmic laminates offer a glow-in-the-dark bowling pattern and table edge molding coordinates with selected accent color. Premium non-glow laminates offer the center a rich look that is accented with black table edge molding.

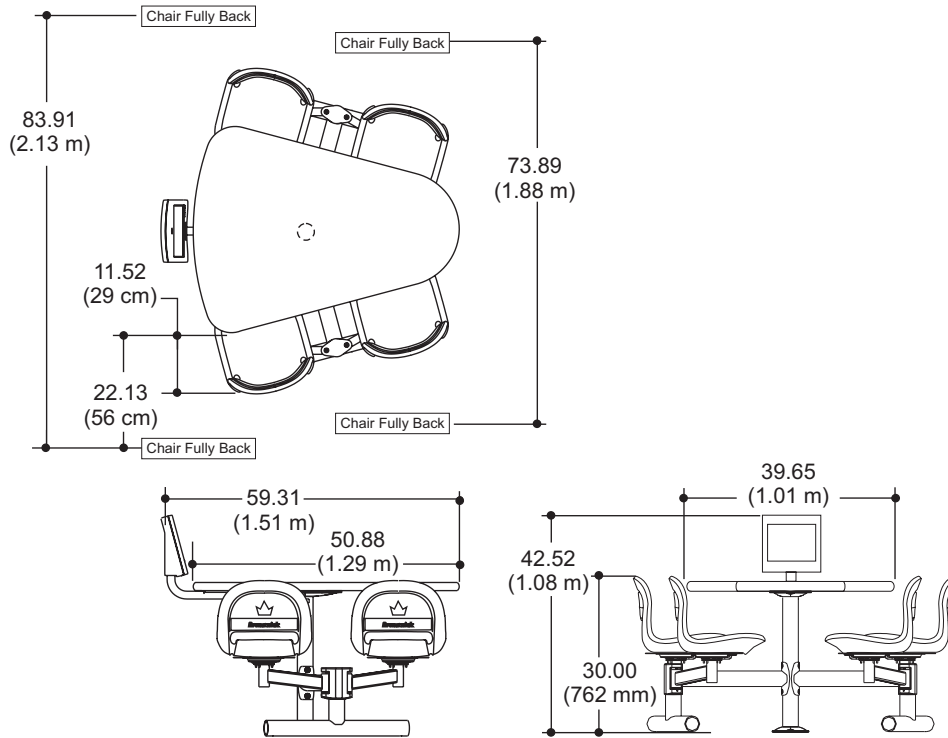

The standard seating is made from a high density polyethylene plastic, built to withstand the rigors of the bowling environment. Flame resistant seats are also available to meet the EU requirements. The standard seats have colored inserts to coordinate with table edge molding color accents. Premium seats consist of a steel frame and are finished with oven-baked epoxy/polyester powder coating. The wood finish is available in dark cherry finish on oak or natural finish on maple.

Some tables accommodate an optional, patented table-mounted scoring console with LCD or keypad. Refer to product specifications for details.
