

CLEANING GUIDELINES

CLEANING AND DISINFECTING BRUNSWICK PRODUCTS

When bowling center operations resume, it will be imperative to create a safe and clean environment for guests. According to the CDC, COVID-19 can remain on surfaces for hours and even days after they are first contaminated. As a part of this effort, Brunswick has developed this guide to assist with cleaning and disinfecting Brunswick products.

We recommend that centers follow the following general guidelines to keep employees safe:

- Employees should wear disposable gloves when cleaning and disinfecting equipment. Wash hands after removing gloves.
- Always power off all electronic equipment before cleaning.
- Avoid soaking or submerging products in liquid. If a spray disinfectant is used, use a clean microfiber cloth and wipe down the product gently. Do not spray disinfectant directly on the products.

The Environmental Protection Agency (EPA) recently posted a list of Registered Antimicrobial Products for Use Against Novel Coronavirus SARS-CV-2, the Cause of COVID-19. Recommended registered products for use with Brunswick equipment:

- Diversey Virex II, 256, manufacturer [website](#)
- PDI Sani-Cloth AF3 Germicidal Disposable Wipes, manufacturer [website](#)

Unless otherwise noted, do NOT clean your Brunswick equipment with any of the following products or products containing these chemicals as they may cause permanent damage:

- Bleach
- Ammonia
- Solvents such as acetone and paint thinner
- Abrasive agents

SCORING AND MANAGEMENT SYSTEMS

Brunswick recommends these disinfectants for use with Brunswick scoring and management systems:

- Diversey Virex II, 256
- PDI Sani-Cloth AF3 Germicidal Disposable Wipes
- Alcohol-based wipes
- IPA-99, if sprayed on a microfiber cloth to better control application

Cleaning Procedure:

- Turn off your device.
- Use a microfiber cloth dampened with a disinfectant or wipe to gently clean touch panel displays, plastic, and painted surfaces.
- Follow disinfectant manufacturer's instructions for proper application and use.
- After each application disinfectants may be allowed to air dry.

Important Notes:

- Cleaners/disinfectants should be used at the manufacturer recommended dilutions and never in concentrated form.
- Never spray, coat, or pour cleaning fluids directly on electronic devices.
- To avoid damage to components, never use bleach, hydrogen peroxide, thinners, or ketone-based solvents.
- Take care to ensure that guests cannot accidentally use alcohol-based wipes to clean Center Stage or Striking line furniture.

FURNITURE WITH VINYL AND FABRIC – CENTER STAGE & STRIKING LINE

The following products on the EPA list have been tested safely on Naugahyde vinyl-coated and Crypton fabrics. Brunswick recommends these disinfectants for use with Brunswick Center Stage and Striking line furniture lines:

Naugahyde Vinyl and Crypton Woven Fabrics:

- Diversey Virex II, 256
- PDI Sani-Cloth AF3 Germicidal Disposable Wipes

CLEANING GUIDELINES

Cleaning Procedure:

- Use a microfiber cloth dampened with approved cleaning solution or wipe to gently clean the seating area.
- Follow disinfectant manufacturer's instructions for proper application and use.
- After each application disinfectants **MUST** be wiped off with clean water and dried with a clean microfiber towel to remove any chemical residue that can discolor or degrade the material surface

Important Notes:

- Use a microfiber cloth dampened with approved cleaning solution or wipe to gently clean the seating area.
- Follow disinfectant manufacturer's instructions for proper application and use.
- After each application disinfectants **MUST** be wiped off with clean water and dried with a clean microfiber towel to remove any chemical residue that can discolor or degrade the material surface.

Other approved non-germicidal cleaners include:

- Crypton Leather/Vinyl cleaner
- Solution of 10% household liquid dish soap (Dawn dish soap or equivalent) and warm water

FRAMEWORX SEATING, LAMINATE TABLES, BALL RACKS, AND BALL RETURNS

Brunswick recommends these disinfectants for use with Brunswick hard seating, laminates, ball racks, and ball returns:

- Diversey Virex II, 256
- PDI Sani-Cloth AF3 Germicidal Disposable Wipes
- Alcohol-based wipes
- IPA-99, if sprayed on a microfiber cloth to better control application

Cleaning Procedure:

- Use a microfiber cloth dampened with approved cleaning solution or wipe to gently clean the product.
- Follow disinfectant manufacturer's instructions for proper application and use.
- After each application disinfectants may be allowed to air dry.

Important Notes:

- Cleaners/disinfectants should be used at the manufacturer recommended dilutions and never in concentrated form.
- To avoid damage to components, never use bleach at anything other than recommended dilution, hydrogen peroxide, thinners, or ketone-based solvents.
- Alcohol-based wipes may damage Center Stage and Striking Line furniture. If center elects to make wipes available to guests, take care to ensure that wipes are approved for use by Brunswick.

The situation is fluid and subject to change as the CDC learns more about the virus and methods to keep guests safe. Check with the CDC to see the latest standards and guidance.

The cleaning recommendations above are a guide to help in the maintenance and cleaning of Brunswick products. They are supplied without warranty, representation, or inducement of any kind, including, but not limited to, the implied warranties of merchantability and fitness for particular use or purpose. Brunswick can neither guarantee, nor take responsibility for specific results.

Under no circumstances shall Brunswick be liable for any incidental, consequential, or other damage resulting from negligence, misuse, mishandling or exposure of any chemicals used in connection with maintenance. Users must read the product specifications and determine appropriateness for specific applications and safety. All label instruction precautions should be followed. All cleaning agents must be rinsed thoroughly with water and wiped with a soft cloth. Residue left by cleaning agents will shorten the life of the product if not removed.
