BULLETIN

Subject: Wick Pad Update Notification

Date: 9/16/02

Distribution: All Wick Pad Machine Customers

Bulletin No. CEB02-7

The purpose of this bulletin is to inform all Pad machine operators of a design change that has been made to the support plate of the wick pad assemblies. The new design eliminates the use of adhesive to attach the wick material to the wick plate, making them “glueless”. The new support plate is shaped like a “J” and holds the wick material using the hardware that is supplied with the assembly. The wick material for the new assemblies is now one inch taller totaling five inches (point of contact with transfer roller remains the same). This change makes replacing the wick material much easier. All wick sizes are affected but will not be available until existing stock is depleted from inventory. Refer to Figures 1 and 2 for photos that will point out the specific changes that have been made.

EYEBOLTS ARE ABOVE
WICK MATERIAL.
WICK FELT IS
GLUED TO PLATE.

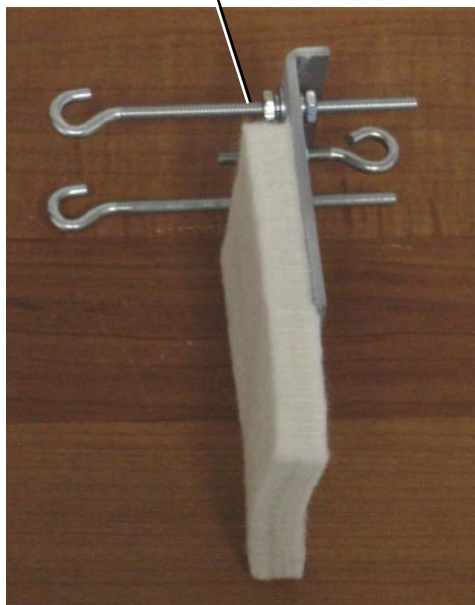

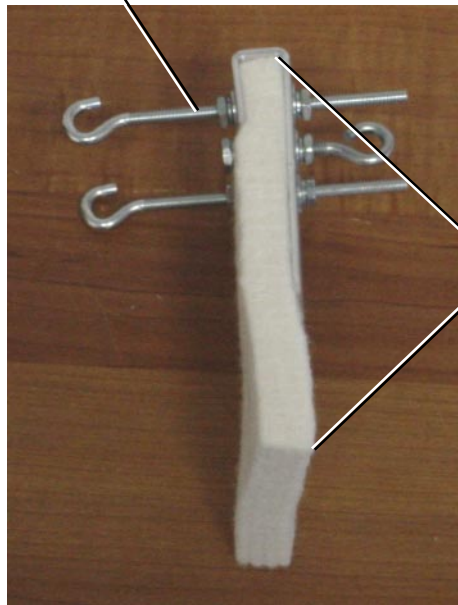

Figure 1 - Initial Style (153-8103)

EYEBOLTS PASS
THROUGH
WICK MATERIAL,
SECURING IT TO
THE PLATE

WICK MATERIAL IS
1 INCH TALLER TO
COMPENSATE FOR IT
BEING RECESSED
INTO PLATE. OVERALL
ASSEMBLY IS STILL
SAME SIZE AS
INITIAL STYLE.

Figure 2 - Improved Style (153-8103A)

Refer to Figure 3 for a list of the old and NEW part numbers for the wick assemblies and the stock wick material:

DESCRIPTION	INITIAL PART #	NEW PART #
Wick Felt 45" (4" Tall)	153-0005	
Wick Felt 45" (5" Tall)		153-0005B*
3" Wick Assembly	153-8103	153-8103A*
4" Wick Assembly	153-8104	153-8104A
5" Wick Assembly	153-8105	153-8105A*
6" Wick Assembly	153-8106	153-8106A
7" Wick Assembly	153-8107	153-8107A*
8" Wick Assembly	153-8108	153-8108A
9" Wick Assembly	153-8109	153-8109A
10" Wick Assembly	153-8110	153-8110A*
11" Wick Assembly	153-8111	153-8111A
12" Wick Assembly	153-8112	153-8112A

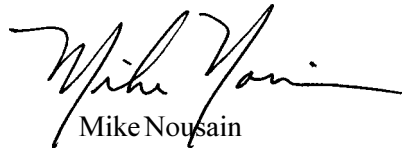

* = NOW AVAILABLE
