SERVICE BULLETIN

Subject: New GS Series Pinsetter Tools

Date: 7/14/06

Distribution: GS Series Pinsetter Customers

Bulletin No. SB06-3

We are pleased to announce the introduction of the following new GS Series Pinsetter tools.

GS Polycord Round Belt Trim Tool - 47-860009-000

In order to maintain top notch GS pinsetter performance, keeping proper tension on the Polycord round belt is very important. Welding the Polycord together to achieve proper tension is easy; but properly trimming the belt after welding can sometimes be a chore. This trim tool makes the trimming process painless. Simply wrap the tool around the weld bead, rotate the tool and cut the old bead away. Tool can be used for 12mm, 13mm or 15mm round belting.

## GS Pinsetter Spud Wrench - 47-900011-000

No need for multiple tools! The GS spud wrench, used by installers for years, is now available for bowling center technicians. The tool combines 13mm and 17mm twelve point socket/ratchet in one tool, and has a spud style handle to easily install green round belting on pulleys. Save time by using one tool for your GS pinsetter maintenance.

GS Pinsetter Adjustment Gauge Block - 47-900012-000

Perform GS adjustments with this easy to use all-in-one tool. No need for a tape measure!
This pinsetter gauge block features 10 pinsetter check dimensions for adjusting GS Series pinsetters. From the 135mm dimension for the shark to the elevator frame to the 15mm setting table height dimension, this gauge has it all.

If you have any questions about the information contained in this Service Bulletin, call the Customer Support Line at 1-800-323-8141 (option #1, #1) if calling inside the U.S.   For assistance outside the U.S., please contact your local Brunswick area office.
