

ANACONDA™ — NEW

With its Rough Buff finish, and aggressive Activator Plus™ coverstock providing durability and longevity of ball reaction, the Anaconda™ will rev quickly in the mid-lane with a strong continuous backend reaction that matches up on medium to medium-oily lane conditions for a wide range of bowling styles.

60-105310

INFERNO CORE

The Anaconda uses an updated version of the original Inferno core. The ultra low RG Inferno core revs quickly providing mid-lane traction control with a strong predictable backend motion.

PRO TIP

"The Anaconda is one of the smoothest rolling balls we have. This ball has a very even arc that is extremely controllable on any condition."

Parker Bohm III

DIAMONDBACK™

The first ball with Activator Solid™ coverstock available at the Advanced Performance price point. Activator Solid coverstock is a proven formula that provides strong downlane recovery, longevity of ball reaction, and unprecedented durability with superior resistance to cracking. This ball is clean through the front with an aggressive move at the breakpoint.

60-105244

MULTI-SIDED ROCKET CORE

This low RG core helps the ball get into an earlier roll creating more mid-lane recovery on today's high viscosity oils and hard synthetic lane surfaces.

PRO TIP

"This ball has a smooth motion and is very predictable down lane. I trust it to pick up an earlier roll and continue through the pins without losing energy."

Stefanie Nation

RATTLER™

This low RG, multi-sided Rocket™ core, combined with original Activator™ coverstock, produces a ball reaction that is unmatched at the Advanced Performance price point. Clean through the front with an aggressive move at the breakpoint, the Rattler delivers amazing bang for the buck. There isn't another ball in this class that's even close.

60-104976

PRO TIP

"I use my Rattler when I need to clear the front part of the lane, the heads, and finish with an aggressive backend reaction."

Carolyn Dorin-Ballard

PYTHON™

With a more direct line of attack on the lane, a fast revving core and constricting power on the pins – the Python provides a secure ball reaction at the Advanced Performance price point. For the bowler who wants to play straighter angles with predictable power.

60-105210

LOW RG CORE

The Original Inferno® with an adjusted weight distribution between the inner and outer core to raise the overall RG, aid in clearing the fronts, rev in the mid-lane and deliver a more continuous backend motion.

PRO TIP

"This is the first ball out of my bag. I can tell what part of the lane I'm going to play by throwing it three or four times."
