Information Sheet

Part Number

61-103368

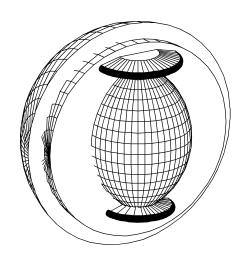

Specifications

Reactive PowrKoil 17-Highly Polished

Hook Potential: 80 Typical length: 135 Breakpoint Shape: 80

RG Max: 2.584 RG Min: 2.531 RG Diff.: 0.053 Average RG: 4.5

Reaction Characteristics

The Reactive Monster joins the ProActive Purple Monster to create a mid-price ball set with dramatically contrasting ball reactions. The Reactive Monster combines the time tested PowrKoil 17 coverstock with Monsters unique **Monster Body** and **Double Death** end-caps core system to deliver a powerful but smooth ball reaction. Best suited for medium oily to medium dry lane conditions the Reactive Monster is the perfect complement to the Purple Monster's ProActive ETX- 4 aggressive traction performance. The combination of the Reactive Monster for moderately oily lanes and the ProActive Monster for heavier oiled lanes gives a huge range of ball reactions that delivers frightening performance that will make other mid-price ball sets tremble in fear.

Drilling Information

Monster unveils a new symmetric core shape to the Brunswick family of products. The core is a medium - high RG configuration with a similar medium - high RG differential (.053). This core system combined with the PowerKoil 17 coverstok is drillable using standard drilling techniques.
