

Brunswick® **Monster® SlayR™ - Reactive**

Part Number

60-103986-93X

Coverstock

PowrKoil LS™ - Reactive

Color: Red Pearl

Hardness: 78-80

Glow Engraving

Factory Finish

High Gloss Polish

Core Dynamics

RG Max: 2.543

RG Min: 2.500

RG Diff.: 0.043

Average RG: 3.5

Performance

Hook Potential: 70

Length: 165

Typical Breakpoint Shape: 90

Available Weights

10-16 Pounds

(10-11 use a spherical offset core)

Hook Potential: Low (10) High (150)

Length: Early (25) Long (235)

Breakpoint Shape: Smooth Arc (10) Angular (100)

Flare Potential: Low (0.0) High (0.080)

RG-average: Center Heavy (1) Cover Heavy (10)

Reaction Characteristics – Slay the second shift

The **Monster SlayR** introduces the latest addition to the PowrKoil family of coverstocks, **PowrKoil LS**. Long & Strong, Late-Shift, Long-Skid, Late-Snap all describe the performance of **PowrKoil LS**. The SlayR is a medium hook potential ball that comes alive on lanes that have a lot of dry boards, such as broken-down or top-hat (blocked) oil patterns. The SlayR goes significantly longer than balls that use Brunswick's more aggressive PowrKoil or N'Control coverstocks, but the SlayR matches the more aggressive balls backend hooking action when used on the drier lane conditions it was designed for.

The **Monster SlayR** uses a Mushroom shaped core derived from the very popular **Quantum** family of high performance balls. Designed to match up to the slicker lane oils used today, the SlayR features a high density inner core to produce a low average RG and medium flare potential ball. This strong core, in combination with the High Gloss PowrKoil LS coverstock allows the SlayR to generate strong down-lane recovery with a powerful but predictable breakpoint when used on drier lanes.

Utility

- Out of the Box:** With its high gloss surface the **Monster SlayR** matches up well on broken-down or top-hat (blocked) medium to dry lane conditions.
- When dulled:** The **Monster SlayR's** hooking action will increase and its arc will become more even, creating a better match-up for medium-oily lane conditions and for smoothing over/under reactions seen on wet/dry lane conditions.

Reaction Setup

The **Monster SlayR** can be drilled using the standard drilling techniques developed for two-piece balls, see the included drilling instructions for reaction characteristics and layout details.

The **Monster SlayR** is finished with a high gloss surface which enhances its appearance **and** reduces hooking action in the oil. High gloss finishes can sometimes cause over/under reactions, too little hooking action in the oil, then too much hooking action off the dry, which can be hard to control. To increase hooking action and smooth out the ball reaction dull the surface, first with a fine 800-1000 grit abrasive. If more hooking action and a smoother reaction is desired dull the surface of the ball with a coarse 320-400 grit abrasive.

Bring your **Monster SlayR** back to its original Factory Finish with Brunswick's new **High Gloss Polish**. Available at your local proshop.

Brunswick's Monster-Series delivers the bowling industry's widest range of Proactive and Reactive ball reactions available at the mid-price point. At rock bottom prices to boot.
