Polished
Hook Potential: 19-11(dull/shiny)
Typical Length: 2.5
Typical Backend: 10.5
Center/Cover Heavy: 1.7
Track Flare Potential: 10+
.

Reaction Characteristic

The **Red Alert - Night Flash** combines a pearlized version of the popular PowrKoil18 coverstock with a modified Danger Zone core to produce the most aggressive ball in history with a touch more lenght than the origional Red Alert. This combination creates an early rolling, even arching ball with the highest hook potential ever. Red Alert is perfect for medium to heavy oil lane conditions and a wide array of bowler styles.

Notes on Drilling

All weights of the **Red Alert** can be drilled using the techniques developed for two-piece balls. See Brunswick's "Seven Popular Layouts" for detailed drilling information.
