

## POWER GROOVE<sup>®</sup> REACTIVE

Reactive coverstocks respond more aggressively to dry lane surfaces, increasing backend hooking action and hitting power. All Power Groove reactive balls feature PowrKoil 17<sup>™</sup>, the strongest reactive coverstock ever used on a Groove-class ball, and Brunswick DISC<sup>™</sup> (Differential Increasing Side Cylinders) core technology.

**NEW** — Lime/Lavender Pearl 60-105220

### DISC CORE

Differential Increasing Side Cylinders.

The precise geometric placement of high density side cylinders maximizes the increase in RG differential while maintaining symmetry for easy drilling.

### PRO TIP

"A nice ball to have when you need to get down the lane but still have some pop at the end"

*Diandra Asbaty*
