SOUL MATE™ ORANGE FIRE PEARL

AFFORDABLE

COVERSTOCK

The **CPTv2 - Flip** reactive coverstock describes the updated version 2 of our low friction coverstock. The Chemical Projection Technology Flip formulation allows for a lower friction reactive coverstock that easily projects down the lane and provides a more controllable hook motion on medium oil lane conditions.

CORE

The **Soul Medium RG symmetrical** core features a multi-sided core system. This core design creates an optimum medium RG match up for low friction coverstock.

BALL MOTION

With its Royal Shine finish, the **Soul Mate** will skid longer with a quicker response to friction at the breakpoint making it a perfect companion to the Soul. The **Soul Mate** is great ball for rev dominant and slower ball speed players on light oil conditions.

REACTION SETUP

The **Soul Mate** can be drilled using the standard drilling techniques developed for symmetric core bowling balls.

LIGHTWEIGHT ENGINEERING

At Brunswick, the unique core shape of each individual ball is used for weights from 12 to 16 pounds. This approach to lightweight ball engineering provides bowlers with consistent ball reaction characteristics across this weight range.
