

WILD THING™ — NEW

The Wild Thing and its new ultra-low RG Paragon core improves the adhesion of the ConneXion™ coverstock to the lane, accelerating the response to friction and unleashing its attack on the pins. This core/coverstock combination allows the Wild Thing to generate a shape never seen before in the Brunswick line.

60-105212

PARAGON CORE

The new ultra-low RG Paragon core was designed with two intentions. First, to lower the RG to create a faster revving core that will provide improved mid-lane traction. Second, to raise the RG differential to increase the track flare potential, which will generate more overall hook with standard layouts and the use of interchangeable thumb sleeves.

PRO TIP

"When oil carries down lane, this ball picks up, continues and goes through the pins in a meaningful way. This ball needs to be in your arsenal!"

Parker Bohn III

WILD RIDE™

The Wild Ride delivers the proven medium RG Torsion™ asymmetric core at the High Performance price point. This core/coverstock combination allows the Wild Ride to skid easily through the front part of the lane, dig in aggressively at the end of the mid-lane, then stick strong to the backend—providing powerful traction off the break point. The ConneXion coverstock, united with the familiar Torsion asymmetric core, provides a ride that is untamed.

60-104978

TORSION ASYMMETRICAL CORE

The Wild Ride migrates the proven medium RG Torsion asymmetric core into the High Performance price point.

PRO TIP

"The Wild Ride is clean through the fronts, allowing the ball to store energy and make a strong but smooth move on the backends. It allows me to move in and open up the lane."

Diandra Asbaty

MAXXX ZONE®

The MaXXX Zone core uses the same inner core shape as the Smash Zone®, however the weight distribution between the inner core and the outer core has been adjusted to raise the overall RG. This means even with its aggressive PlaZma™ coverstock, the MaXXX Zone will clear the fronts and provide maximum traction in the mid and the backends, even on the tightest lane conditions.

60-104963

MAXXX ZONE CORE

The MaXXX Zone uses an updated version of the original Inferno® core.

PRO TIP

"Regardless of how oily the lanes are, this ball is best used for going up the lane. A great ball for controlling the pocket."
