

A Magic Duo

The Brunswick **Mesmerize** and **Vaporize** were created in tandem to complement each other and supply the Brunswick lineup with new technology and unbeatable performance. These two new Brunswick balls raise the bar for performance at each end of the spectrum.

We are excited for bowlers to see this next phase of ball motion from Brunswick. **Mesmerize** has it all: a unique four-color appearance, a sharp two-color logo for appeal, a new Tri-Elliptic core that is wrapped with DynamiCore2, and HK22 with Cohesion and Evo Solid additives.

We took a different approach when developing **Vaporize**. We didn't start with a new core design but used the breakthrough Cohesion additive to create a more dynamic, shiny performance. HK22 has changed the game when it comes to shiny ball performance and Vaporize compounds its strengths with the addition of Cohesion and Evo Pearl Additives.
